

ON-Time submission Policy of dot. Ethiopia

Welcome to the Police, dot. Ethiopia MERN Stack Bootcamp! We're excited to have you onboard and equip you with the skills to excel in web development. This policy outlines expectations for attendance and assignment submissions throughout the program.

1. Attendance:

On-Time Submission is Key:

- **Technical Assignments & Soft Skill Tasks:** Completing both technical coding exercises and soft skill tasks on time is vital for your success in this program. Submitting assignments by the designated **due date** ensures you stay on track with the curriculum and receive timely feedback.
- Onsite presence is mandatory for four days per week.

Here's why on-time submissions matter:

- **Maximize Learning:** Completing tasks reinforces your understanding of the concepts covered in video tutorials.
- **Develop Strong Habits:** Time management and meeting deadlines are crucial skills in the tech industry. This program helps you build these habits from the beginning.
- **Instructor Feedback:** Submitting work on time allows instructors to provide valuable feedback that helps you learn and improve your skills.

Remember:

- The core learning happens through completing the pre-recorded video tutorials in Moodle and the associated tasks.
- **Don't wait until the last minute!** Start working on assignments early to ensure you can submit them on time.

Additional Notes:

- We encourage you to actively participate, ask questions, and seek clarification whenever needed.

2. Task Submissions:**Access and Progression:**

- **Task Completion and Access:** You'll gain access to the next tutorial only after completing the tasks associated with the current one. This ensures a foundational understanding before moving on to new concepts.
- **Falling Behind:** Repeated failure to submit assignments within the grace period may result in you falling behind in the program curriculum and potentially hinder your access to future content.
- **Consequences of Non-Compliance: Consistent** failure to submit assignments within the grace period may lead to dismissal from the program. Open communication with instructors about any foreseen challenges is highly encouraged.
- **Don't Wait Until the Last Minute:** Starting assignments early ensures you have ample time to complete them to a high standard and submit them on time.
- **Completeness:** We encourage you to submit your best work for each task, even if it's not fully complete. This allows instructors to provide valuable feedback to help you progress.

3. Importance of Adherence:

- **Developing Strong Habits:** Timely attendance and task submissions are crucial skills expected in professional web development careers. This program helps you build these habits from the start.
- **Maximizing Learning:** Regular participation and completing tasks are essential for your learning journey. They allow you to actively engage with the material, practice your skills, and receive valuable feedback from instructors.

4. Consequences of non-adherence:

- **Absence for three consecutive days:** Missing sessions and failing to submit assignments for 3 consecutive days without prior communication with instructors may *lead to dismissal from the program*.
- **Communication is Key:** If you anticipate any issues that might affect your attendance or submissions, please communicate them to the instructors beforehand. We understand unexpected situations arise, and open communication allows us to find solutions together.

Remember, we're here to support your success! By following these guidelines, you'll maximize your learning experience and build a strong foundation for your MERN Stack development journey.

Additional Notes:

- This policy is subject to change at the discretion of Police. Dot.Ethiopia Bootcamp. Any changes will be communicated to all participants.
- We encourage you to actively participate, ask questions, and seek clarification whenever needed.

We believe in your potential! Let's embark on this exciting learning journey together.
